(54) Title: CONTROL OF PROGRAMMED DEATH (PCD) IN PLANTS

(57) Abstract: The invention relates to a method of controlling programmed cell death in plants. In one aspects the present invention relates to such a method wherein a transgenic plant is produced that is less susceptible to stress-induced programmed cell death. The invention thus provides a method for controlling programmed cell death in a plant or plant-part comprising modifying the activity and/or expression of 2-oxoglutarate dehydrogenase-homologous protein in the cells of said plant or plant-part.
